

# CopperSmith® Sink Buying Guide

*Find the right sink for you.*

## Rustic Line

These sinks are artisan crafted from 14 gauge recycled copper. They are only available in a hammered texture, and have a living finish that may change slightly over time. It's an authentic, rustic look. These sinks are available in a variety of patinas. Hammered basin sinks may hold a bit of water due to the handcrafted nature of the product. Pair with oil rubbed bronze drains.

## Modern Line

These sinks are expertly crafted from 14 gauge virgin cold rolled copper. They are only available in smooth texture, sloped basins, zero radius corners & sound dampening pads. These sinks are constructed with precision. Cad drawings are typically available for granite and stone cuts. Available in a variety of patinas or raw finish. Sinks ordered with a patina will be sealed for a maintenance free finish. Pair with raw copper, antique or bronze drains.

## Classic Line

These sinks are artisan crafted from 14 gauge virgin cold rolled copper. They are only available in hammered texture. Cad drawings are typically available for granite and stone cuts. Available in a variety of patinas or raw finish. Hammered basin sinks may hold a bit of water due to the handcrafted nature of the product. Sinks ordered with a patina will be sealed for a maintenance free finish.
